Answer All the Questions

1. Consider online order processing system which consists of a two multiple choice lists and one single choice list. [15]

- The first multiple choice list, displays the Major dishes available.
- The second multiple choice list, displays the Starters available.
- The single choice list, displays the Soft drinks available.

The selected items from all the lists should be captured and displayed in a Text Area along with their respective costs. Use JavaScript Event handler to calculate the total cost of all the selected items and display the total cost at end of the Text Area. A 'Clear' button is provided to clear the Text Area.

- ✓ (b) Draw table for given code. [5]

```
<TABLE border="1"
```

```
summary="This table gives some statistics about fruit
```

```
flies: average height and weight, and percentage
```

```
with red eyes (for both males and females).">
