## **NETAJI SUBHAS UNIVERSITY OF TECHNOLOGY**

A STATE UNIVERSITY

UNDER DELHI ACT 06 OF 2018, GOVT. OF NCT OF DELHI

Azad Hind Fauj Marg, Sector-3, Dwarka, New Delhi-110078

# SCHEME OF COURSES AND EXAMINATION FOR

BACHELOR OF TECHNOLOGY

COMPUTER SCIENCE & ENGINEERING
(ARTIFICIAL INTELLIGENCE)

(Effective from the Session: 2019-2020)

#### APPROVED BY

The Senate in its II to VII meetings

The Board of Management in its meeting held on

August 14, 2019

## 1. INTRODUCTION

NSUT has embarked on its journey towards excellence in academics through the introduction of a novel system of learning that is being followed in many reputed universities globally. The Choice Based Credit System (CBCS) has been proposed by University Grants Commission (UGC) on recommendations of the National Knowledge Commission, to improve the quality of higher education in India. NSUT proposes to adopt CBCS for its Bachelor of Technology courses

CBCS is the mother of student centric educational reforms. A student is provided with an academically rich, highly flexible learning system blended with abundant provision for skill practice and activity orientation that he/she could learn in depth without sacrificing his/her creativity. A student can exercise the option to decide his/her own pace of learning-slow, normal or accelerated plan and sequence his/her choice of paper, learn to face challenges through term work/ project work and may venture out to acquire extra knowledge/ proficiency through add- on facilities. The great advantage of CBCS is that the learning process is made continuous and the evaluation process is not only made continuous but also made learner-centric and is designed to recognize the capability and talent of a student.

## 2. CURRICULUM STRUCTURE

B.Tech. programme of the University shall be based upon CBCS and shall have well defined Programme Educational Objectives (PEOs). All the courses shall have well-defined Course Outcomes (COs). Courses shall be of three kinds: Core, Elective and Foundation.

- a. Core Course (CC): This is a course which is to be compulsorily studied by a student as a core requirement to complete the requirements of the B.Tech. programme.
- b. Elective Course: This is a course which can be chosen from a pool of elective courses. It is intended to support the discipline of study by

providing an expanded scope, enabling exposure to another discipline/domain and nurturing a student's proficiency and skill. An elective may be of the following types:

- i. Discipline Centric Elective (ED): It is an elective course that adds proficiency to the students in the discipline.
- ii. Generic Elective (EG): It is an elective course taken from other engineering subjects and enhances the generic proficiency and interdisciplinary perspective of students.
- iii. Open Elective (EO): It is an elective course taken from a common pool of non-engineering disciplines that broadens the perspective of an engineering student. These electives shall comprise two groups: Open electives of the Humanities, Social Sciences and Management group and Open electives of the Sciences group.
- c. Foundation Course: A Foundation course leads to knowledge enhancement and provides value-based training. Foundation courses may be of two kinds:
  - Compulsory Foundation (FC): It is based upon the content that leads to fundamental knowledge enhancement in Sciences, Humanities, Social Sciences and Basic engineering. They are mandatory for all disciplines.
  - ii. Elective Foundation (FE): It can be taken from among a common pool of foundation courses which aim at value-based education. They may provide hands-on training to improve competencies, skills or provide education on human, societal, environmental and national values. These shall be mandatory, non-credit courses, which do not carry any credits but a student has to pass in order to be eligible for award of degree.

## 2.1 EVALUATION AND ASSESSMENT

The performance of a student in a semester shall be evaluated through continuous class assessment, MSE and ESE. Both the MSE and ESE shall be University examinations and will be conducted as notified by the CoE of the University. The marks for continuous assessment (Sessional marks) shall be awarded at the end of the semester. The continuous assessment shall be based on class tests, assignments/tutorials, quizzes/viva-voce and attendance etc. The MSE/ESE shall comprise of written papers, practicals and viva-voce, inspection of certified course work in classes and laboratories, project work, design reports or by means of any combination of these methods.

The weightage of each of these modes of evaluation for the different types of courses shall be as per Table 1. Further, the mechanism for continuous assessment shall be as per Table 2.

Table-1: Evaluation Scheme

| S. | Type of       | Continu  | Mid-       | End-                       | Continu  | End-      |

|     |                   |   |
| 4   | Training Training | As specified by the Department              |
| - / | 05 7/ //          |   |
| 5   | Audit Courses     | As specified by the Department              |

\*\*\* Foundation Elective Courses are value-based courses which may enhance the proficiency /skill. These electives could be communication skills, Spoken English, soft skills, Business and Management courses, entrepreneurship development, Knowledge of an additional Foreign Language, Personality Development through sports, music, theatre, dance, etc.

The University provides to the students a pool of Foundation elective courses which may be offered by the following departments of the University:

- i) Department of Humanities
- ii)Department of Management
- iii)Department of Personality Development

## Note for Undergraduate students--

- i)An Undergraduate student will have the liberty to choose any three foundation elective course to study from the given list.
- ii) He/She can take only one foundation elective course in an ongoing semester.
- iii) The study and clearing of foundation elective course is to be done by the end of  $2^{nd}$  year (fourth semester).
- iv) For getting a Degree, it is mandatory to clear the entire three chosen foundation elective course.
- v) Foundation elective courses are auditable course and there is no credits awarded to the students.

Note for Course Teacher--

The evaluation of the student is done through continuous assessment.

[Subject having Theory only] --The course teacher evaluate through TWO class tests (25 marks each), ONE Assignment/Project (40 marks) and internal evaluation [one such component is attendance] (10 marks).

[Subject having Theory and Practical]—Here, a course teacher evaluate for theory part through TWO class test (20 marks each) and internal evaluation [one such component is attendance] (10 marks). Similarly, for practical part ONE practical test (40 marks) and internal evaluation [one such component is attendance] (10 marks)

[Subject having Practical only]—The course teacher takes TWO practical test (45 marks each) and internal evaluation [one such component is attendance] (10 marks)

## 2.3 COURSE CODE NOMENCLATURE

The courses of various B.Tech programmes shall be assigned a course code as per the following nomenclature

## 2.3.1 COURSE/DEPARTMENT/SPECIALIZATION/BRANCH CODING.

The courses of various B.Tech programmes shall be assigned a course code as per the defined nomenclature (Given later). This nomenclature shall use course/department/specialization/branch coding which are defined as given below.

TABLE 4: COURSE/DEPARTMENT CODES

|    | Course Category Code                | FC         | Foundation Core                          |
|----|-------------------------------------|------------|--|
| XX |                                     | FE         | Foundation Elective                      |
|    |                                     | EO         | Open Elective                            |
|    |                                     | BT         | Bio Technology                           |
|    |                                     | CH         | Chemistry                                |
|    |                                     | CP         | Computer Engineering, East Campus        |
|    |                                     | CS         | Computer Science & Engineering           |
|    |                                     | CW         | Civil Engg, West Campus                  |
|    |                                     | EE         | Electrical Engineering                   |

## 2.3.2 B.TECH COURSE CODE NOMENCLATURE

FOUNDATION CORE AND ELECTIVE COURSES AND OPEN ELECTIVE COURSES:

| C  | ourse   | Offering Dep | oartment Code | - N                 | Cou | rse No. |
|----|---------|--------------|---------------|---------------------|-----|---------|
| Ca | itegory | \/ I         | MCHI          | $\Gamma \sqcup V_J$ |     |         |
| X  | X       | Y            | Y             | 0                   | *   | *       |

<sup>\*\*</sup> can take numeric values only

XX and YY maybe chosen as given in Tables 1,2:

\*PD offers FE courses like music, dance, yoga, sports, NSS, etc. A BOS for FE courses of PD nature (like Music, Dance, Yoga, NSS, etc), has be constituted with Dean Academics as the chairperson.

## OTHER CORE AND ELECTIVE COURSES:

| Progra | ım Code | Offering Department | Course Category | Course | No. |
|--------|---------|---------------------|-----------------|--------|-----|
|        | 1       | Code                | 11 CX           |        |     |
| Z      | Z       | A.W.V.E.K.C.L       | C/E             | *      | *   |

<sup>\*\*</sup> can take numeric only;

C for Core and E for Elective (Discipline Centric); YY and ZZ maybe chosen as given in Tables 1,2.

# 2.3.3 MOOCS (NPTEL BASED) FOUNDATION ELECTIVE COURSES AND OPEN ELECTIVE COURSES:

| C  | ourse  | Offering D | Department | UG/PG | Cours | se No. |
|----|--------|------------|------------|-------|-------|--------|
| Ca | tegory | (NPTE      | L) Code    |       |       |        |
| X  | X      | F          | F          | G     | *     | *      |

<sup>\*\*</sup> can take numeric only;

| XX | Course Category Code | FE | Foundation Elective |
|----|----------------------|----|---------------------|
|    |                      | EO | Open Elective       |

|    |                                  | NH   | Humanities & Social     |  |  |  |
|----|----------------------------------|------|-------------------------|--|--|--|
|    | N COCC : D                       | 1111 | Sciences                |  |  |  |
| FF | Name of Offering Department Code | NM   | Management              |  |  |  |
|    | for NPTEL                        | NP   | Personality Development |  |  |  |
|    |                                  | NS   | Sciences                |  |  |  |
| G  | UG/PG                            | 0    | B.Tech                  |  |  |  |
|    |                                  | Ī    | M.Tech                  |  |  |  |

## 2.3.4 STUDENT ROLL NUMBER NOMENCLATURE:

Students shall be assigned roll numbers as given below.

## 1. B.Tech:

| Year of Admission | U | ZZ | (FROM TABI | E 2) | 4 DIGIT | NUMBER |
|-------------------|---|----|------------|------|---------|--------|
|                   |   |    |            |      |         |        |

## 3 SEMESTER WISE COURSE ALLOCATION

## 3.1 COURSE ALLOCATION FOR SEMESTER I

Refer to the separate manual on Equivalent courses and scheme of courses with pre-requites if you want to find the linked courses and pre\_requisites for opting for EG courses.

| B.Tech - <u>Computer Science &amp; Engineering (Artificial Intelligence)</u> SEMESTER I |     |  |   |   |   |             |        |    |               |           |        |                               |                               |

<sup>1:</sup> One week induction program as per AICTE norms. Classes for I semester will commence one week later.

Students of the Departments of Group I shall be offered courses as follows:

- 1. Semester I: Computer Programming, Physics
- 2. Semester II: English, Environment Science and Green Chemistry

Students of the Departments of Group II shall be offered courses as follows:

- 1. Semester I: English, Environment Science and Green Chemistry
- 2. Semester II: Computer Programming, Physics

VAS UNIVERSITY OF

## 4. SYLLABUS OF COURSES

## 4.1 SYLLABUS OF FOUNDATION COMPULSORY COURSES

| Course No. | Title of the Course | Course<br>Structure | Pre-requisite |
|------------|---------------------|---------------------|---------------|
| FCMT001    | Mathematics - I     | 3L - 1T - 0P        | None          |

## COURSE OUTCOMES (COs):

- 1. Analyze and test Infinite Series and its convergence,
- 2. Successive differentiation and expansion of the function,
- 3. Curvature and Radius of Curvature in different coordinate systems,
- 4. Applications of definite integral,

5. Consistency of system of equations, Eigenvalue and Eigenvector.

## COURSE CONTENT:

#### UNIT-I

Infinite Series: Tests for convergence of series: p-series (with proof), Comparison of ratios, Ratio, Integral, Raabe's, Logarithmic and Cauchy's nth root (all tests without proofs), Alternating series, Absolute convergence, Conditional convergence. Function of Single

#### UNIT-II

Variable: Hyperbolic functions, inverse hyperbolic function, successive differentiation, Leibniz theorem, Taylor's and Maclaurin's theorems (without remainder terms).

#### UNIT-III

Curvature: Polar Curves, Differential coefficients of length of arc, Cartesian, polar and parametric forms, pedal equation, Angle between tangent and radius vector, Curvature and Radius of Curvature in Cartesian, polar and pedal forms.

#### **UNIT-IV**

Applications of definite integral: Asymptotes (in Cartesian), elementary knowledge of curve tracing, area, length, surface area and volume of revolution (in Cartesian, parametric and polar co-ordinates).

#### UNIT-V

Matrices: Elementary row transformation, Rank of matrix, consistency and inconsistency of system of simultaneous equations, solution of non-homogeneous and homogeneous equations, Eigenvalue and Eigenvector, Characteristic equation, Cayley-Hamilton theorem. Modal matrix

## SUGGESTED READINGS:

- 1. Calculus and Analytic Geometry by G.B. Thomas (Pearson Education)
- 2. Advanced Engineering Mathematics by Erwin Kreyszig (Wiley Publication)
- 3. Advanced Engineering Mathematics by Michael Greenberg (Pearson Education)
- 4. Advanced Engineering Mathematics by R. K. Jain and S.R.K. Iyenger (Narosa

Publication)

5. Higher Engineering Mathematics by B. S. Grewal (Khanna Publication)

| Course No. | Title of the | Course       | Pre-requisite |

## COURSE OUTCOMES (COs):

- 1. To understand the basic terminology and program structures used in computer programming to solve real world problems.
- 2. To understand the need for continuing to learn new languages to solve complex problems in different domains.
- 3. To learn the process of representing problems and writing, compiling and debugging programs.
- 4. To develop programming skills in using different types of data, decision structures, loops functions, pointers, data files and dynamic memory allocation/de-allocation.

5. To be able to code using Procedural and Object-Oriented languages.

#### COURSE CONTENT:

#### UNIT-I

Basics of C: Basic features of C Language like Identifier, Keywords, Variable, data types, Operators and Expression, basic screen and keyboard I/O, Control Statements, iteration, nested loops, Enumerated data types, bitwise operators, C Preprocessor statements. [6 hours]

#### UNIT-II

Arrays and Pointers: One and multidimensional dimensional arrays, strings arrays, operations on strings, Array and Pointers, Pointer to Pointer, other aspect of pointers, User Defined Data Types: Structures, Unions. [6 hours]

#### UNIT-III

Functions: Concept of modular programming, Using functions, Scope of data, Recursive functions, Pointers and functions, Command line arguments.

Files: Types of files, working with files, usage of file management functions.

[6

hours

## UNIT-IV

Overview of Object Oriented Programming: Python Programming, Concepts and Terminology. Data Types and Collection Data Types: Identifiers and keyword, Integral types floating point types, operations and formatting, Sequence types, Tuples, named Tuples, lists, set Types, sets, frozen sets, mapping types, Dictionaries, Iterating and Copying collections iterators and interactable operations and functions copying collection.

Central Structures and Functions: Conditional branching, looping, Exception handling catching and raising exceptions, custom exceptions custom functions, Names and Docstrings, Argument and Parameter unpacking, Accessing variables in Global scope, lambda functions. [9 hours]

#### UNIT-V

Modules and Packages: Packages, custom modules, overview of python's standard library, string handling, mathematics and Numbers, Times and dates, File formats, Data persistence.

File Handling: Writing and Reading binary data, raw binary data, compression, parsing text files, Random Access binary files, generic binary record file class.

[9

## hours]

Guidelines for practical work:

Programs based on concepts of above languages.

## Course Outcomes:

- 1. To understand the basics of AC and DC circuits, transformers along with DC generator and motor
- 2. To analyze series-parallel RLC circuits and
- 3. To implement basic circuits using diodes, BJTs and op-amps as circuit elements
- 4. To get familiarized with OP-AMP and its applications
- 5. To develop circuits using basic electrical and electronic components

#### COURSE CONTENT

### Unit-I

Electric Circuits: Basic Circuit Elements, Nodal and Loop Analysis,

Superposition, Thevenin's Theorem & Norton's Theorem and Maximum Power Transfer Theorem;

#### Unit-II

Steady-state analysis of AC circuits: Sinusoidal and phasor representation of Voltage and current, single phase AC circuit, behavior of R, L and C

Combination of R, L and C in series and parallel, Resonance; Introduction to three-phase circuits, Star-Delta Transformation

#### Unit-III

Transformers: Principle of operation and construction of single-phase transformer, Introduction to DC Motor.

Electronics Devices and Circuits: Junction Diode, Applications: rectifiers, clipping and clamping circuits, LEDs;

#### Unit-IV

Bipolar-junction Transistor: Physical operation, operating point, load-line, Self-bias circuit, single-stage CE amplifier configuration

Ideal op-amp, inverting, non-inverting and unity gain amplifiers, integrator, differentiator, summer/subtractor.

#### Unit-V

Digital circuits- Boolean Algebra, logic gates, K-Maps upto 4-variables, Combinational circuits: Adders and subtractors.

Flip-Flops: SR, JK, D, T and their characteristic tables. Introduction to Sensors, Introduction to Embedded Computers.

List of experiments for Electrical and Electronics Engineering

- 1. Verification of Maximum Power Transfer theorem
- 2. Verification of Thevenin's and Norton's theorems
- 3. Study of resonance in series RLC and parallel RLC circuits
- 4. Analysis of step-up and step-down transformer

- 5. Implement of series RC circuit as differentiator and integrator. Also perform their analysis as low pass and high pass filters
- 6. Implementation of clipping and clamping circuits
- 7. Implementation of half-wave and full wave rectifier circuits
- 8. Application of LEDs in electronic circuits
- 9. Implementation of CE amplifying configuration. Plot gain vs frequency graph
- 10. Implementation of Adders and subtractors.
- 11. Implementation of JK and Toggle flip-flops. Subsequently implement 3-bit asynchronous up-counter.
- 12. Measurement of power in single phase circuits using three voltmeter and three ammeter method.
- 13. Experiments with common sensors
- 14. Experiment with embedded computers

## Suggested Reading:

- 1. M.E. Van Valkenburg, "Network Analysis" Pearson publishers, 3<sup>rd</sup> Edition
- 2. Boylestad and Nashelsky, "Electronic Devices and Circuit Theory" Pearson publishers, 10th Edition
- 3. Edward Hughes, "Electrical and Electronic technology", Pearson publishers, 10<sup>th</sup> Edition
- 4. Malvino and Leach, "Digital Principles and Applications", TMH publishers, 8th Edition

| Course No. | Title of the Course | Course Structure | Pre-Requisite |

#### COURSE OUTCOMESS (CO):

- 1. Knowing important concepts and phenomena linked to relativity
- 2. The concept of waves and oscillations are useful for doing analytical and numerical calculations for measurements, observations and gravitational wave communications.
- 3. The course is helpful to the students in understanding various optical wave phenomena which are required for optical & electromagnetic wave communications and in optical devices.
- 4. To develop the basic understanding of laser for gaining advance knowledge in the field of optical communication and opto-electronics.
- 5. The Concepts of Optical Fiber for modern developments in physics which are helpful in designing and developing new devices used in optical communications, medicine, environment, Industries and related physics.

## COURSE CONTENT:

#### UNIT-I

Relativity: Special Relativity, Lorentz Transformations, Velocity addition, Time dilation, Length Contraction, Variation of mass with velocity, Mass and energy, Relativistic momentum and relativistic energy, General theory of relativity, Einstein's theory of Gravitation, Gravitational waves, Gravity and Light.

#### UNIT-II

Oscillations and Waves: Damped and forced oscillations, Sharpness of resonance, Q-factor, Application in resonance, Acoustic waves, Pressure wave equations, Intensity pressure relation, Acoustic impedance, Reflection and transmission of acoustic waves, Impedance matching; Ultrasonics and its applications.

#### UNIT-III

Optics: Interference: Interference due to thin films, Newton's rings, and determination of the wavelength of sodium light, Interference due to wedge shaped film. Diffraction: Fraunhofer diffraction due to single slit and N Slits, Plane transmission grating, Rayleigh criterion of resolution, Resolving power of a grating, Polarization: Polarization in light, Birefringence, Nicol prism, Quarter and half wave plates, Production and analysis of plane, Circularly and elliptically polarized light, Optical rotation, specific rotation, Polarimeter.

#### UNIT-IV

Lasers: Absorption and emission of radiation, Main features of a laser, Spatial and temporal coherence, Einstein Coefficients, condition for light amplification, Basic requirement for Laser, Population Inversion - Threshold Condition, Line shape function, Optical Resonators, Three level and four level systems. Classification of Lasers: Solid State Laser-Ruby laser and Gas Laser- He-Ne laser (Principle, Construction and working), Optical properties of semiconductor, Semiconductor laser (Principle, Construction and working), Applications of lasers in the field of medicine, Industry, Environment and Communication.

## **UNIT-V**

Fibre Optics: Need for fiber Optic Communication, Physical nature of Optical fiber, Theory of Light propagation in optical fiber, Acceptance angle and numerical aperture, Step index and graded index fibers, Single mode and multimode fibers, Losses in optical fiber, Optical Fiber cables and bundles, Dispersion in optical fibers: Intermodal and Intramodal dispersion.

## List of Experiments:

- 1. To determine the value of "g" by Bar Pendulum and find the radiu gyration.
- 2. To determine the wavelength of He-Ne laser.
- 3. To find the numerical aperture and angle of acceptance of optical fibe
- 4. To find the resolving power of a telescope.
- 5. To find the wavelength of sodium light by Newton's ring.
- 6. To find the wavelength of sodium light by Biprism.
- 7. To find the wavelength of Mercury green line by diffraction grating us spectrometer.
- 8. To find the focal length of combination of two lenses by Nodal s assembly and verify the formula.
- 9. To find the specific rotation of canesugar by polarimeter.
- 10. To find the dispersive power of prism material using spectrometer.

#### SYLLABUS OF CORE ENGLISH

| Course No. | Title of the Course | Course<br>Structure | Prerequisite |
|------------|---------------------|---------------------|--------------|
| FCHS 005   | Core English        | 3L 0T 2P            | None         |

#### Course Outcomes

- CO 1: Acquire competence in Basic English grammar. Grammatical accuracy, avoiding inappropriacy and using language naturally and confidently
- CO 2: Improve in the four integral skills of language and to be able to use language as a tool for effective communication
- CO 3: Enable the learner to express and be understood by others with clarity and precision, in both written and spoken forms, minimizing ambiguity and verbosity.
- CO 4: Understand creative use of language through translation, articles and paragraph writing.
- CO 5: Reading: Encouraging the habit of reading for different purposes and to analyse, paraphrase and read critically.
- CO 6: Develop competence in formal Standard English pronunciation and usage
- CO 7: Build confidence to use a standard spoken form of English to face job interviews, and workplace interactive situations besides enabling the learner to pursue advanced professional courses.

## COURSE OUTCOMES (COs)

After completion of this course, the students are expected to be able to demonstrate the following knowledge, skills and attitudes:

- 1. To know force, its nature and applications.
- 2. To know the basic principles of civil and mechanical structures.
- 3. To understand the fundamentals of thermodynamics and fluid mechanics.
- 4. To know the working principles of IC Engines.
- 5. To understand the importance of different engineering materials.
- 6. To understand the different manufacturing processes and machining operations.
- 7. To know the use of Automation in manufacturing.

## COURSE CONTENT

## Group A

#### Unit-I

Introduction to Engineering Mechanics: Rigid and Elastic bodies, Force and its type, Law of parallelogram of forces, Triangle law of forces, Polygon law of forces, Lami's theorem, Laws of motion, Moment, Couple, Varignon's theorem, Conditions of equilibrium, Concept of free body diagram, Coulomb's friction, Plane trusses, Analysis of trusses, Numerical problems. (6 Hours)

#### Unit-II

Introduction to Strength of Materials: Simple stresses and strains, Direct, shear, and volumetric stresses and strains, Hooke's law, Tension test, Elastic constants, Poisson's ratio, Factor of safety, Introduction to beam, Types of beams, Types of loads, Shear force and bending moment diagrams (SFD and BMD) for Simple and Cantilever beams under various loading conditions, Numerical problems. (6 Hours)

## Unit-III

<u>Introduction to Manufacturing Engineering:</u> Classification and use of engineering materials, Basic principles and applications of methods of manufacturing such as casting, forming and joining; Working principles and applications of machining operations such as Turning, Thread cutting, Milling, Shaping, Grinding, etc., Use of automation in manufacturing. (6 Hours)

## Group B

#### Unit-IV

<u>Introduction to Thermodynamics</u>: Thermodynamic system, Cycle, Path, Thermodynamic properties, Extensive and intensive properties, Thermodynamic equilibrium, Reversible and irreversible processes, isochoric, Isothermal, Isobaric, Isentropic and Polytropic processes, First

law of thermodynamics applied to a cycle and process, Kelvin-Planck and Clausius statements of Second law of thermodynamics, Carnot cycle, Entropy, Clausius inequality, Internal combustion (IC) engines, IC engines terminology, Spark ignition (SI) and Compression ignition (CI) engines, Two and four stroke engines, Air standard cycles such as Otto, Diesel, Dual and Brayton cycles, Numerical problems. (12 Hours)

## Unit-V

Introduction to Fluid Mechanics: Properties of a fluid, Density, Specific volume, Specific weight, Specific gravity, Kinetic and Kinematic viscosity, Pascal's law and its applications, Laminar and turbulent flow, Use of continuity equation and Bernoulli's equation, Numerical problems. (6 Hours)

### SUGGESTED READINGS

- 1. Engineering Mechanics- Beer and Johnston, Pearson
- 2. Strength of Materials- D.K. Singh, CRC Press
- 3. Engineering Thermodynamics- Nag, McGraw-Hill
- 4. Fluid Mechanics- Cengel, McGraw-Hill
- 5. Fundamentals of Manufacturing Engineering- D.K. Singh, CRC Press

| Course No. | Title of the Course | Course Structure | Pre-Requisite |
|------------|---------------------|------------------|---------------|
| FCMT007    | Mathematics II      | 3L-1T-0P         | None          |

## COURSE OUTCOMES (CO)

- 1. Ordinary Differential Equations,
- 2. Partial Derivatives, Maxima and Minima for functions of two or more variables,
- 3. Evaluation of double and triple integral,
- 4. Concept of Numerical Methods and its Applications,
- 5. Concept of Probability and Statistics and its Applications.

#### COURSE CONTENT:

## **UNIT-I Ordinary Differential Equations:**

Second & higher order linear differential equation with constant coefficients, general solution of homogenous and non-homogenous equations, Euler-Cauchy equation, Series solution by Frobenius method.

#### **UNIT-II Function of Several Variables:**

Partial Derivatives, Euler's Theorem, Total differentiations, Change of Variables, Jacobian and its basic properties, Taylor's theorem, Maxima and Minima for functions of two or more variables, Lagrange's method of undetermined multipliers.

#### **UNIT-III** Multiple Integrals:

Evaluation of double integral (in Cartesian and polar co-ordinates), change of order of integration, change of variables. Triple integral (in Cartesian) and its applications. Gamma and beta function.

#### **UNIT-IV** Numerical Methods:

Solution of system of linear equations using Gauss elimination method, LU decomposition method Gauss Seidel iteration method, Solution of polynomial and Transcendental equations by Newton-Raphson method, Numerical Integration by trapezoidal rule and Simpson's 1/3 and 3/8 rule, Numerical Solutions of first order ordinary differential equations: Euler's method, Runge-Kutta method of fourth order.

## UNIT-V Probability and Statistics:

Conditional probability, Random Variables, Probability distribution functionsbinomial, Poisson, exponential, uniform and normal distributions; Correlation, rank correlation and regression analysis; Sampling Theorem.

#### Recommended Books:

- 1. Calculus and Analytic Geometry by G.B. Thomas (Pearson Education)
- 2. Advanced Engineering Mathematics by Erwin Kreyszig (Wiley Publication)
- 3. Advanced Engineering Mathematics by Michael Greenberg (Pearson Education)
- 4. Advanced Engineering Mathematics by R. K. Jain and S.R.K. Iyenger (Narosa Publication)
- 5. Higher Engineering Mathematics by B. S. Grewal (Khanna Publication)
- 6. Probability and Statistics for Engineers by Anthony J. Hayter (Cengage Learning)
- 7. Numerical Methods for Scientific and Engg. Computations by M. K. Jain, S. R. K. Iyenger and R. K. Jain, (Wiley Eastern Ltd.)

#### 4.2 FOUNDATION ELECTIVE COURSES

## 4.2.1 LIST OF FOUNDATION ELECTIVES

#### 4.2.2 SYLLABI OF FOUNDATION ELECTIVES

| Course No. | Title of the Course | Course Structure | Pre-Requisite |
|------------|---------------------|------------------|---------------|
| FEPD001    | Sports-I            | 0L-0T-4P         | None          |

#### COURSE OUTCOMES (CO):

To evolve a higher education system that is suitability blended with provision for knowledge values and skill practice where every student learns in without sacrificing his/her creativity.

COURSE CONTENT: (Any 2 out Of 5 Components)

- A. INTRODUCTION TO PHYSICAL EDUCATION IN THE CONTEMPORARY CONTEXT (Any Two)
- 1. Learn and demonstrate the technique of Suryanamaskar.
- 2. Develop Physical Fitness through Calisthenics / Aerobics / Circuit-Training / Weight-Training and demonstrate the chosen activity.
- 3. Select any one game available in the college and learn different techniques involved in its play
- B. CORE PHYSICAL EDUCATION-: FITNESS, WELLNESS AND NUTRITION (Any Two)
- 1. Measurement of Fitness Components Leg-raise for Minimal Strength (Muscular Strength); Sit-ups Muscular Endurance); Harvard Step Test, Run and Walk Test (Cardiovascular Endurance); Sit and Reach Test (Flexibility)
- 2. Measuring height, weight, waist circumference and hip circumference, Calculation of BMI (Body Mass Index) and Waist-Hip Ratio
- 3. Engage in at least one wellness programme and write a report on it.
- C. CORE PHYSICAL EDUCATION-: POSTURE, ATHLETIC CARE AND FIRST AID (Any Two)
- 1. Demonstrate Stretching and Strengthening Exercises for Kyphosis, Scoliosis, Lordosis, Knock Knees, Bow Legs, Flat Foot, Back Pain and Neck Pain
- 2. Illustration and Demonstration of Active and Passive Exercises
- 3. Asanas with Therapeutic Value (Any five asanas): Karnapeedasana, Padmasana, Dhanurasana, Sarvangasana, Paschimottanasana, Chakrasana, Halasana, Matsyasana, Ardhmatsyendrasana, Usthrasana, Mayurasana, Shirshasana, Vairasana.
- 4. Practice P.R.I.C.E. in First Aid.
- D. SPORTS ADMINISTRATION & MANAGEMENT (Any Two)
- 1. Demonstration of Supervision activities in Sports Management.
- 2. Demonstration of skills of Management.
- 3. Demonstration of fixtures of various kinds in sports competitions.
- 4. Demonstration of technical and non-technical purchase procedure.
- E. Adventure Sports and Leadership Training

#### SUGGESTED READINGS:

- 1. Graham, G., `Teaching Children Physical Education: Becoming a Master Teacher. Human Kinetics," Champaign, Illinois, USA.
- 2. Corbin, C. B., G. J. Welk, W. R Corbin, K. A. Welk, `Concepts of Physical Fitness: Active Lifestyle for Wellness," McGraw Hill, New York, USA.
- 3. Anspaugh, D.J., G. Ezell and K.N. Goodman, ``Teaching Today Health," Mosby Publishers

- 4. Beotra, Alka, "Drug Education Handbook on Drug Abuse in Sports," Applied Nutrition Sciences, Mumbai.
- 5. Ammon,R., Southall, R.M. and Blair, D.A., `Sports Facility Management, 'West Virginia, USA: Fitness Information Technology Publishers

| Course No. | Title of the Course | Course Structure | Pre-Requisite |
|------------|---------------------|------------------|---------------|
| FEPD002    | Sports-II           | OL-OT-4P         | FE001         |

#### COURSE OUTCOMES (CO):

To evolve a higher education system that is suitability blended with provision for knowledge values and skill practice where every student learns in without sacrificing his/her creativity.

#### COURSE CONTENT:

(Any 3 out Of 5 Components)

- A. Sports for all (Any Two)
- 1. To participate in any intramural Tournaments (one team game and one Individual Game) of choice.
- 2. To participate/ attend at least 15 hours in Fitness training at Field or at Gymnasium.
- 3. Participate in at least one track and one field event on Annual Sports day.
- 4. To participate in Inter College Tournament
- B. Skill Enhancement Courses (any one out of three)
- 1. Wellness and Fitness
- 2. Holistic personality Development
- 3. Sports Journalism
- 4. Mass demonstration Activities

## C. MEDIA AND CAREERS IN PHYSICAL EDUCATION (Any Two)

- 1. Organize an event / intramural / tournament in your college.
- 2. Prepare a News Report of an observed Sports competition.
- 3. Create a presentation on any topic from Physical Education using an audiovisual aid.
- 4. Demonstrate Warming-up / Conditioning / Cooling-down exercises.

## D. MANAGEMENT OF AEROBICS & GROUP TRAINING (Any Two)

- 1. Measurement of Fitness Components Leg-raise for Minimal Strength (Muscular Strength); Sit-ups (Muscular Endurance); Harvard Step Test or Run and Walk Test (Cardiovascular Endurance); Sit and Reach Test (Flexibility)
- 2. Measurement of Pulse Rate / Heart Rate at Radial Artery and Carotid Artery, Calculation of Target Heart Rate
- 3. Developing a 5-10 minute routine of aerobics with appropriate music for each component of health related physical fitness

#### E. SPORTS INDUSTRY & MARKETING (Any Two)

- 1. Identify an issue or a trend in the sports industry: o Players in professional or college sports o Ownership
- 2. Marketing Plan: Environmental Factors and Product Plan Draft, Paper bibliography/works cited.
- 3. Sponsorship proposal
- 4. Developing a budget plan for an event

### 5. Athlete branding

#### SUGGESTED READINGS:

- 1. Covey, S., ` 7 Habits of Highly Effective People, "Covey Publications, USA
- 2. Magill, R.A., `` Motor Learning and Control: Concepts and Applications," McGraw Hill Publication.
- 3. Masteralexis, L.P., C. Barr and M. Humms, "Principles and Practices of Sport Management," Jones and Bartlett Publisher
- 4. Bishop, J.G., "Fitness through Aerobics," Benjamin Cummings USA.
- 5. Brown K.M., ` Physical Activity and Health: An Interactive Approach," Jones and Bartlett Publisher
- 6. Cornwell. T.B, `` Sponsorship in marketing: Effective communications through sports, arts and events, "Routledge Publishers
- 7. DeGarris, L., "Sports Marketing: A Practical Approach," Routledge Publishers, USA

#### 4.3.2 SYLLABI OF PROGRAM CORE COURSES: II SEMESTER

# SEMESTER II B. TECH. COMPUTER SCIENCS & ENGINEERING (ARTIFICIAL INTELLIGENCE)

| Course Code | Туре | Subject                | y. | ĵΤ | P | Credits | CA | MS | ES | CA | ES | Pre-<br>requi<br>sites |
|-------------|------|------------------------|----|----|---|---------|----|----|----|----|----|------------------------|
| CACSC01     | b    | Discrete<br>Structures | 3  | 1  | 0 | 4       | 25 | 25 | 50 | 1  |    | None                   |

#### COURSE OUTCOMES

- 1. To be able to analyze and compute time and space complexity of various computing problems.
- 2. To be able to design algorithms for solving various problems using the concepts of discrete mathematics.
- 3. To apply the concepts and algorithms learnt in developing large scale applications and modify them.
- 4. Get a grasp of the practical problems and their relation with discrete structures.
- 5. Implement practical problems using the discrete structures approach.

#### COURSE CONTENT

#### UNIT-I

Logic: Mathematical Logic, Propositions, Truth Tables, and Logical inferences, Methods of Proof, Propositional Logic, Logical Inference, First order logic, applications, Predicates and quantifiers.

Set Theory, Relations and Functions: Elements of Set Theory, Primitives of set theory, binary Relation and its Representation, type of Binary Relations, Equivalence relations and partitions. Functions, Types of functions, Inverses and composition of Functions.

#### UNIT-II

Counting: Counting and analysis of algorithms, Principles of inclusion-exclusion, Pigeon hole principle, Permutations, Combinations.

Mathematical induction: proof by induction, Recursion, Characteristic Polynomial, Recurrence relation, generating functions, Asymptotic behavior of algorithms.

#### UNIT-III

Posets, Lattices and Group Theory: Posets, Hasse Diagram, Lattices: Definition, Properties of lattices – Bounded, Complemented, Modular and Complete lattice, Boolean Algebra, Groups & rings.

Number Theory: Infinity and Natural numbers, Integers, Divisibility and Euclidean algorithm, Prime numbers, Congruence, Modular arithmetic, Euler of function.

#### **UNIT-IV**

Graphs: Graph isomorphism, Paths and Cycles, Graph coloring, Critical

Path, Eulerian paths and circuits, Hamiltonian paths and circuits, Bipartite Graphs, Digraphs, Multigraphs.

#### **UNIT-V**

Probability: Overview of probability theory, Discrete distributions.

#### SUGGESTED READINGS

- 1. Keneth H. Rosen, "Discrete Mathematics and Its Applications", TMH.
- 2. C.L. Liu, "Elements of Discrete Mathematics", TMH.
- 3. Kolman, Busby & Ross, "Discrete Mathematical Structures", PHI.
- 4. NarsinghDeo, "Graph Theory With Application to Engineering and Computer Science", PHI.
- 5. Charles S. Grimmstead, J. Laurie Snell "Introduction to Probability". Kai Lai Chung, "A Course in probability theory".
- 6. J.P.Tremblay & R. Manohar, "Discrete Mathematical Structure with Applications to Computer Science" Mc.Graw Hill.

| Course<br>Code | Туре | Subject            | 7 | 3 | P | Credits | CA | MS | ES | CA | ES | Pre-<br>requisites |
|----------------|------|--------------------|---|---|---|---------|----|----|----|----|----|--------------------|
| CACSC02        | cc   | Data<br>Structures | 3 | 0 | 2 | 4       | 15 | 15 | 40 | 15 | 15 | None               |

#### COURSE OUTCOMES

- 1. Candidate will be able to choose the appropriate data structure for a specified problem and determine the same in different scenarios of real world problems.
- 2. Become familiar with writing recursive methods and reducing larger problems recursively in smaller problems with applications to practical problems.
- 3. Be able to understand the abstract properties of various data structures such as stacks, queues, lists, trees and graphs and apply the same to real life problems of sorting, searching, and traversals for skill enhancement in problem solving.
- 4. Be able to implement various data structures in more than one manner
- 5. Understand the advantages and disadvantages of the different implementations by using efficient representation of problems.

# **COURSE CONTENT**

#### UNIT-I

Introduction: Basic Terminology: Elementary Data Organization, Data Structure Operations, Algorithms Complexity and Time-Space Trade off. Arrays: Array Definition and Analysis, Representation of Linear Arrays in

Memory, Traversing, Insertion And Deletion in Array, Single Dimensional Arrays, Two Dimensional Arrays, Bubble Sorting, Selection Sorting, Linear Search, Binary Search, Multidimensional Arrays, Function Associated with Arrays, Character String in C, Character String Operations, Arrays as parameters, Implementing One Dimensional Array.

#### UNIT-II

Stacks and Queues: Introduction to Operations Associated with Stacks Push & Pop, Array representation of stacks, Operation associated with stacks: Create, Add, Delete, Application of stacks recursion polish expression and their compilation conversion of infix expression to prefix and postfix expression, Tower of Hanoi problem, Representation of Queues, Operations of queues: Create, Add, Delete, Front, Empty, Priority Queues and Heaps, Dequeue.

#### UNIT-III

Recursion: Recursive thinking, Recursive Definition of Mathematical Formulae, Recursive Array Search, Recursive Data Structure, Problem Solving With Recursion, Back Tracking

Linked Lists:More operations on linked list, polynomial addition, Header nodes, doubly linked list, generalized list, circular linked lists.

#### UNIT-IV

Trees:Trees - mathematical properties, Binary Search Trees and their representation, expression evaluation, Complete Binary trees, Extended binary trees, Traversing binary trees, Searching, Insertion and Deletion in binary search trees, Complexity of searching algorithm, Path length, Huffman's algorithm, General trees, AVL trees, Threaded trees, B trees, Trie data structure UNIT-V

Sorting: Insertion Sort, Quick sort, two-way Merge sort, Heap sort, sorting on different keys, External sorting.

Graphs: Sequential representation of graphs, Adjacency matrices, Search and Traversal of graphs: Depth first, breadth first, topological sort.

Outline of Practical Work:

- Programs based on sorting and searching, implementing stacks, queues, simple calculator using postfix expression, command line calculator changing infix to postfix, implementation of linked lists - a simple editor program, traversal of binary trees, binary search tree creation, insertion, deletion, traversal sorting. AVL tree creation and rotations, Traversal of graphs using BFS and DFS, implementation of topological sorting. Templates and Containers Survey of new data structures.

#### **Suggestive List of Experiments**

1. Write a program to find the mean and the median of the numbers stored in an array.

- Write a program to insert one element in an array and delete an element from an array.
- 3. Write a program to search for a number in an array.
- 4. Write a program to sort an array.
- 5. Write a program to merge two sorted arrays.
- Write a program to store the marks obtained by 10 students in 5 courses in a twodimensional array.
- 7. Write a program to implement a linked list.
- 8. Write a program to insert a node in a linked list and delete a node from a linked list.
- Write a program to print the elements of a linked list in reverse order without disturbing the linked list.
- 10. Write a program to reverse a linked list.
- 11. Write a program to add two polynomials using linked lists.
- 12. Write a program to implement a doubly-linked list.
- 13. Write a program to implement a stack using an array.
- 14. Write a program to implement a stack using a linked list.
- 15. Write a program to implement a queue using an array.
- 16. Write a program to implement a queue using a linked list.
- 17. Write a program to implement a circular queue using an array.
- 18. Write a program to implement a priority queue using a linked list.
- 19. Write a program to implement a double-ended queue using a linked list.
- 20. Write a program to construct a binary tree and display its preorder, inorder and postorder traversals.
- 21. Write a program to construct a binary search tree.
- 22. Write a program to construct a graph.
- 23. Write a program to calculate the distance between two vertices in a graph.
- 24. Write a program to calculate the distances between every pairs of vertices in a graph.
- 25. Write a program to construct a minimal spanning tree of a graph.

#### **COURSE OUTCOMES**

- 1. To get familiarized with number systems, codes, logic gates and Boolean algebra
- 2. To understand fundamental concepts of VHDL modelling for basic digital circuits
- 3. To understand the basic characteristics of various logic families
- 4. To analyze and understand the design process associated with sequential circuits
- 5. To develop basic understanding of programmable logic devices

#### COURSE CONTENT

UNIT-I

Introduction to Digital Systems, Number Systems and Codes: Binary, octal and hexadecimal number systems, Number-Base Conversions, Complements of Numbers, Signed numbers, Fixed and floating point numbers, Binary Arithmetic, Binary Codes: BCD, Gray, Excess-3, ASCII, Error detection and correction codes - parity check codes and Hamming code.

Logic gates, Boolean Algebra and logic minimization: Basic logic operation, Logic gates and Truth tables, Positive and Negative Logic, Boolean Algebra: Basic postulates and fundamental theorems, SOP and POS forms, Min terms, Max terms, Canonical Form, Gate level Minimization: K-map and Quine-McCluskey tabular methods, NAND/NOR implementations

#### UNIT-II

Design Concepts using Hardware Description Language: VHDL Programming Structure, Model, Test Bench, Simulation Tool.

Combinational Logic Modules, their applications and VHDL Modeling: Decoders, encoders, multiplexers, demultiplexers, Parity circuits, Comparators, Code Converters, Arithmetic modules- adders, subtractors, BCD Adder, ALU and multipliers, Implementing boolean function with multiplexers / decoders

#### UNIT-III

Introduction to different logic families: Operational characteristics of BJT and MOSFET as switch, Structure and operations of TTL and CMOS gates, Electrical characteristics of logic gates – logic levels and noise margins, fan-out, propagation delay, transition time, power consumption and power-delay product etc.

#### UNIT-IV

Sequential Logic systems and VHDL Modeling: Basic sequential circuitslatches and flip-flops: RS-latch, SR-flip flop, D-latch, D flip-flop, JK flip-flop, T flip-flop, Setup-time, HOLD Time, Propagation delay, Timing hazards and races, Characteristic Equations.

Sequential logic modules, their applications and VHDL Modeling: shift register: Bidirectional, Universal and Ring Counter; counters: Ripple, Up/Down, Mod N, BCD Counters etc.

#### UNIT-V

State machines: Definition, Classification: Mealy, Moore; Analysis and design of state machines using D flip-flops and JK flip-flops etc.

Memory: Read-only memory, Read/Write memory - SRAM and DRAM, EPROM, EEPROM, USB Flash drive, Testing and testability of logic circuits, Programmable Logic Devices: PROM, PLA, PAL, Basics of CPLD, FPGA etc.

#### DIGITAL LOGIC DESIGN LAB

#### LIST OF EXPERIMENTS

- (1) Verify the truth table of AND, OR, NOT, NAND, NOR, X-OR, X-NOR gates
- (2) Implement all the above mentioned gates by using NAND gates and NOR gates only.
- (3) Design and Implement Half-adder, Full-adder, Half-subtractor,

Full-subtractor using logic gates.

- (4) Design a 4 bit parallel adder and subtractor using IC. Further using the same IC implement BCD to excess-3 code convertor.
- (5) Design a 4 bit magnitude comparator using IC. Also implement 2 bit magnitude comparator using gates only.
- (6) Design and implement a full adder circuit using DECODER and gates. Also implement the same by using complimentary output decoder.
- (7) Design the following Flip-flop using NAND/NOR gates
  - (i) S-R **FF**
  - (ii) DFF
  - (iii) J-K FF
  - (iv) TFF
- (8) Design and implement a MOD 6 synchronous UP counter using T FF.
- (9) Design a 2 bit UP/DOWN counter using J-K FF
- (10) Implementation of full adder
- (11) Implementation of 4X1 MUX
- (12) Conversion of BCD to Excess-3 code
- (13) Implement 3X8 decoder
- (14) Implement 2 bit by 2 bit magnitude comparator

# 4.3.3 SYLLABI OF PROGRAM CORE COURSES: III SEMESTER

SYLLABI III SEMESTER B. Tech. (CSAI)

| E              | B.Tech. Computer Science & Engineering(Artificial Intelligence)-SEMESTER III |                   |   |   |   |         |    |    |    |    |    |                    |  |
|----------------|--|-------------------|---|---|---|---------|----|----|----|----|----|--------------------|--|
| Course<br>Code | Туре   | Subject           | L | Т | P | Credits | CA | MS | ES | CA | ES | Pre-<br>requisites |  |
| CACSC04        | СС   | Web<br>Technology | 3 | 0 | 2 | 4       | 15 | 15 | 40 | 15 | 15 | CACSC02            |  |

#### **COURSE OUTCOMES**

- 1. To understand the development and transition of the web.
- 2. To Learn creating the web pages and apply the styles
- 3. To learn the web programming for simple day to day work.
- 4. To learn fetching the object using latest technologies and using them to process information
- 5. To write a full-fledged web based application and deploy it.

#### COURSE CONTENT

UNIT-1

Introduction, Web Browser, Web 2.0

Introduction, W3C, Web 2.0, Personal, Distributed and Client/Server Computing, Browser Portability, Software Technologies, Web Resources, Customizing Browser Setting, Searching the Internet, Keeping Track of Your Favorite Sites, File Transfer Protocol (FTP), Online Help, Web Resources, Web 2.0?, Search, Content Networks, User-Generated Content, Blogging, Social Networking, Social Media, Tagging, Social Bookmarking, Software Development, Rich Internet Applications (RIAs), Web Services, Mashups, Widgets and Gadgets, Location-Based Services, XML, RSS, Atom, JOSN and VolP, Web 2.0 Monetization Models, Web 2.0 Business Models, Future of the Web, Where to GO for more Web 2.0 Information,

XHTML , Cascading Style Sheets(CSS)

Introduction, Editing XHTML, First XHTML Example, W3CXHTML Validation Service, Headings, Linking, Images, Special Characters and Horizontal Rules, Lists, Tables, Forms, Internal Linking, Meta Elements, Inline Styles, Embedded Style Sheers, Conflicting Style, Linking External Style sheers, Positioning Elements, Backgrounds, Element Dimensions, Box Model and Text Flow, Media Types, Building a CSS Drop-Down Menu, User Style Sheets, CSS 3, Web Resources

UNIT-2

JavaScript: Introduction to Scripting

Introduction, Simple Program: Displaying a Line of Text in a Web Page, Modifying Our First Program, Obtaining User Input with Prompt Dialogs, Dynamic Welcome Page, Adding Integers, Memory Concepts, Arithmetic, Decision Making: Equality and Relational Operators, Web Resources,

JavaScript: Control Statements

Introduction, Algorithms, Pseudo code, Control Structures, if Selection Statement, if ...else selection
Statement, Formulating Algorithms: Counter-Controlled Repetition, Formulating Algorithms: Sentinel-Controlled
Repetition, Formulating Algorithms: Nested Control Statements, Assignment Operators, Increment and
Decrement Operators, Essentials of Counter-Controlled Repetition, For Repetition Statement, Examples Using

the for Statement, Switch **Multiple-Selection** Statement, do....while Repetition Statement, break and continue Statements, Labeled break and Continue Statements, Logical Operators, Summary of Structures Programming, Web Resources

JavaScript: Functions

Introduction, Program Modules in JavaScript, Programmer-Definitions Functions, Function Defamations, Random Number Generation, Example: Game of Chance, Another Example: Random Image Generation, JavaScript Global Functions, Recursion, Recursion vs. Iteration,

JavaScript: Arrays

Introduction, Arrays, Declaring and Allocating Arrays, Examples Using Arrays, Random Image Generator Using Arrays, References and Reference Parameters, Passing Arrays to Functions, Sorting Arrays, Searching Arrays: Linear Search and Binary Search, Multidimensional Arrays, Building an Online Quiz, Introduction to Object Technology, Math Object, String Object, Fundamentals of Characters and Strings, Methods of the string Object, Character-Processing Methods, Searching Methods, Splitting Steins and Obtaining Substrings, XHTML Markup Methods, Date Object, Boolean and Number Objects

Document object Model (DOM):Objects and Collections, introduction, Modeling a Document: DOM Nodes and Trees, Traversing and Modifying a DOM Tree, DOM Collections, Dynamic Styles, Summary of the DOM Objects and Collection, Web Resources, JavaScript: Events, Introduction, Registering Event Handlers, Event onload, Event onmousemove, the event Object and this, Rollovers with onmouseover and onmouseout, From Processing with onfoucus and onblur, More Form Processing with onsubmit and onreset, Event Building, More Events

UNIT-3

XML and RSS

Introduction, XML Basics, Structuring Data, ZXML Namespaces, Document Type Definitions (DTDs), W3CXML Schema Documents, XML Vocabularies, MathML™, Other Markup Languages, Extensible Stylesheet Language and XSL Transformations, Document Object Model (DOM), RSS,

Ajax- Enabled Rich Internet Applications

Introduction, Traditional Web Application vs. Ajax Applications, Rich Internet Applications (RIAs) with Ajax, History of Ajax, "Raw" Ajax Example Using the XMLHttpRequest Object, Using XML and the DOM, Creating a Full-Scale Ajax-Enabled Application, Dojo Toolkit

UNIT-4

IIS and Apache: introduction, architecture, client – server side scripting, requesting documents.

Database: Introduction, RDBMS, SQL – simple queries, ADO.NET object model, Java DB/Apache Derby

PHP: introduction, basics, form processing and business logic, connecting to a database, using cookies.

Ruby on Rails: Intro, Ruby, Rails Framework, scripting

UNIT-5

ASP.NET and ASP.NET Ajax: introduction, creating and running a simple web form example, relationship, generating XHTML code, web controls, sessions tracking.

JavaServer Faces Web Applications:

Java Web technologies, creating and running a simple application in Netbeans, examining a JSP file, event processing life cycle, JSF components, Text vs. graphics components, validation, session cookies, web services

Guidelines for Project work:

Exercises based on these technologies

PS UNIV

# B.Tech. <u>Computer Science & Engineering (Artificial Intelligence)</u>SEMESTER III

| Course<br>Code | Туре | Subject                           | L | т | P | Credits | CA | MS | ES | CA | ES | Pre-<br>requisites |
|----------------|------|-----------------------------------|---|---|---|---------|----|----|----|----|----|--------------------|
| CACSC05        | СС   | Database<br>Management<br>Systems | 3 | 0 | 2 | 4       | 15 | 15 | 40 | 15 | 15 | CACSC02            |

#### COURSE OUTCOMES

At the end of the course students will be able to

- CO1: understand fundamentals of database management systems.
- CO 2: design database models and learn database languages to write queries to extract information from databases.
- CO 3: Identify database anomalies and improve the design of database management system
- CO 4: understand transaction management and concurrency control.
- CO 5: understand storage organization and database recovery.

#### COURSE CONTENT

#### UNIT 1

Introduction: Database management system Characteristics of the Database,
Database Systems and Architecture, Data Models, Schemes & Instances, DBMS
Architecture & Data Independence, Database administrator & Database Users,
Database Languages & Interfaces, DDL, DML, DCL, Overview Relational Data Base
Management Systems

#### UNIT 2

Data Modeling: Data modeling using The Entity-Relationship Model – Entities, Attributes and Relationships, Cardinality of Relationships, Strong and Weak Entity Sets, Generalization, Specialization, and Aggregation, Translating your ER Model into Relational Model, Relationships of higher degree.

#### UNIT 3

Relational Model, Languages & Systems: Relational Data Model concepts, Relational

UNIVERSITY

Model Constraints, integrity constraints, Keys domain constraints, referential integrity, assertions triggers, foreign key

Relational Algebra and calculus, SQL. Database security.

Relational Data Base Design: Functional Dependencies & Normalization for Relational Databases, Functional Dependencies, Normal Forms Based on Primary Keys, (1NF, 2NF, 3NF & BCNF), Lossless Join and Dependency Preserving Decomposition, Functional dependencies and its closure, covers and equivalence.

#### UNIT 4

Transaction Management: Transaction Concept and State, Implementation of Atomicity and Durability, Concurrent Executions, Serializability: Testing of serializability, Serializability of schedules, conflict & view serializable schedule.

Concurrency Control Techniques: Lock-Based Protocols, Timestamp-based Protocols, validation based protocol. Deadlock Handling

UNIT 5

**Recovery System** 

Recoverability: Failure Classification, Storage Structure, Recovery and Atomicity, Log-based Recovery, Shadow Paging, Recovery with Concurrent Transactions

Storage organization: Indexing, Hashing, file storage.

# **List of Experiments:**

Following is only a suggestive list of experiments. For better coverage faculty may increase the list of experiments.

Q 1: Consider the following relational schema

SAILORS (sid, sname, rating, date\_of\_birth)

**BOATS** (bid, bname, color)

RESERVES (sid, bid, date, time slot)

Write the following queries in SQL and relational algebra

- a) Find sailors who've reserved at least one boat
- b) Find names of sailors who've reserved a red or a green boat in the month of March.
- c) Find names of sailors who've reserved a red and a green boat
- d) Find sid of sailors who have not reserved a boat after Jan 2018.

- e) Find sailors whose rating is greater than that of all the sailors named "John"
- f) Find sailors who've reserved all boats
- g) Find name and age of the oldest sailor(s)
- h) Find the age of the youngest sailor for each rating with at least 2 such sailors
- Q2. Consider the following relational schema:

CUSTOMER (cust num, cust lname, cust fname, cust balance);

PRODUCT (prod\_num, prod\_name, price)

INVOICE (inv\_num, prod\_num, cust\_num, inv\_date\_,unit\_sold, inv\_amount);

Write SQL queries and relational algebraic expression for the following

- a) Find the names of the customer who have purchased no item. Set default value of Cust\_balance as 0 for such customers.
- b) Write the trigger to update the CUST\_BALANCE in the CUSTOMER table when a new invoice record is entered for the customer.
- c) Find the customers who have purchased more than three units of a product on a day.
- d) Write a query to illustrate Left Outer, Right Outer and Full Outer Join.
- e) Count number of products sold on each date.
- f) As soon as customer balance becomes greater than Rs. 100,000, copy the customer\_num in new table called "GOLD CUSTOMER"
- g) Add a new attribute CUST\_DOB in customer table
- Q 3: Consider the following relational schema

DEPARTMENT(Department\_ID, Name, Location\_ID)

JOB (Job ID, Function)

EMPLOYEE (Employee ID, name, DOB, Job\_ID, Manager\_ID, Hire\_Date, Salary, department id)

Answer the following queries using SQL and relational algebra:

- a) Write a query to count number of employees who joined in March 2015
- b) Display the Nth highest salary drawing employee details.
- c) Find the budget (total salary) of each department.
- d) Find the department with maximum budget.
- e) Create a view to show number of employees working in Delhi and update it automatically when the database is modified.
- f) Write a trigger to ensure that no employee of age less than 25 can be inserted in the database.

#### **Q4: PROJECT**

Students are required to develop a DBMS for the applications assigned to them. Following items are required to be submitted for the project

- a) Problem Statement
- b) ER model/Relational Model
- c) Integrity Constraints implemented
- d) Suitable Queries to create and manage database

Note: Students have to make sure that they have defined proper integrity constraints to ensure consistency of database used in assignments as well as project.

#### COURSE OUTCOMES

- 1. To be able to analyze the asymptotic performance of algorithms.
- 2. To be able to write rigorous correctness proofs for algorithms.
- 3. Ably demonstrate a familiarity with major algorithms and data structures.
- 4. To be able to apply important algorithmic design paradigms and methods of analysis.
- 5. To be able to synthesize efficient algorithms in common engineering design situations.

#### CONTENTS

#### UNIT I

Design and Analysis of Algorithms Asymptotic notations and their significance, introduction to RAM model of computation, complexity analysis of algorithms, worst case and average case. Basic introduction to algorithmic paradigms like divide and conquer, recursion, greedy, etc.

#### UNIT II

Searching: binary search trees, balanced binary search trees, AVL trees and red-black trees, B-trees, skip lists, hashing Priority queues, heaps, Interval trees, tries. Order statistics. Sorting: comparison based sorting - quick sort, heap sort, merge sort: worst and average case analysis. Decision tree model and (worst case) lower bound on sorting. Sorting in linear time - radix sort, bucket sort, counting sort, etc. String S. UNIVERSIT matching.

#### UNIT III

Graph Algorithms: BFS, DFS, connected components, topological sort, minimum spanning trees, shortest paths - single source and all pairs. Models of computation: RAM model and its logarithmic cost. Formal introduction to algorithmic paradigms: divide and conquer, recursion, dynamic programming, greedy, branch and bound, etc. Advanced data structures: Fibonacci heap, union-find, splay trees. Amortized complexity analysis

#### **UNIT IV**

Randomized algorithms: Randomized algorithms to be introduced a bit early, i.e., before NP-completeness to highlight randomization as an algorithmic technique.

Application areas: Geometric algorithms: convex hulls, nearest neighbor, Voronoi diagram, etc. Algebraic and number-theoretic algorithms: FFT, primality testing, etc.

#### UNIT V

Graph algorithms: network flows, matching, etc. Optimization techniques: linear programming Reducibility between problems and NP-completeness: discussion of different NP-complete problems like satisfiability, clique, vertex cover, independent set, Hamiltonian cycle, TSP, knapsack, set cover, bin packing, etc. Backtracking, branch and bound, Approximation algorithms: Constant ratio approximation algorithms.

#### COURSE OUTCOMES

- 1. To understand the architecture of modern processors and organization of its components, and relationship between hardware and software in digital machines.
- 2. To design instructions and corresponding logic circuits for a simple CPU with its essential components such as ALU, a register file, memory and input-output.
- 3. To understand the organization of computer systems
- 4. To understand the computation standards and using them in writing algorithms
- To appreciate the evolving technology that governs the evolution of modern computers and continue to keep abreast of state-of-art in computing technology

#### COURSE CONTENT

# UNIT-1

Overview of computer organization: Characteristics of a general purpose computer, The stored program concept, von Neumann architecture, Harvard architecture, Programmer's model - the Instruction set architecture (ISA), ISA design and performance criteria, Basic computer organization with CPU, memory and IO subsystems, Interconnect busses, Evolution of CISC and RISC based processors and their merging. UNIVERSIT

UNIT-2

Instruction Set Architectures: Machine instruction, Machine cycle and Instruction cycles, Instruction Set: memory and non-memory reference instructions, instruction categories: data movement, data manipulation, program control and machine control instructions, CISC types addressing modes and instruction formats, RISC type addressing modes and instruction formats.

UNIT-3

Central Processing Unit: Specification of a simple CPU using RTL, Design of the data path

for the simple CPU, Designing the hardwired control path for the simple CPU, Performance analysis of the simple CPU, Enhancement of the ISA for the simple CPU and design

extensions, Characteristics of RISC CPU design: ISA characteristics, pipelining, data and instruction caches, Practical case studies in CISC type and RISC type CPU designs.

UNIT-4

Microprogrammed Control Unit: Control memory system, Microinstructionsequencing, conditional branch, mapping and subroutines, direct, horizontal and vertical microcoding, micro-instruction format and symbolic representation, design of micro-control unit for a simple CPU, applications of microprogramming

कतवा

Memory organization: Memory hierarchy, Cache organization: Direct, associative and Set associative cache, Auxiliary memory organization, RAID organizations

Input output organization: IO interfacing, Asynchronous data transfer, Programmed IO, Interrupt driven IO, Priority schemes, Direct Memory Access, Serial communication techniques

UNIT-5

Computer arithmetic: Design of Binary addition and subtraction units, Algorithms for multiplication and division and their implementation, Floating point arithmetic, etc.

Pipelined architecture: Basic concepts of pipelining, Speedup and throughput, Minimum Average Latency, Instruction pipeline.

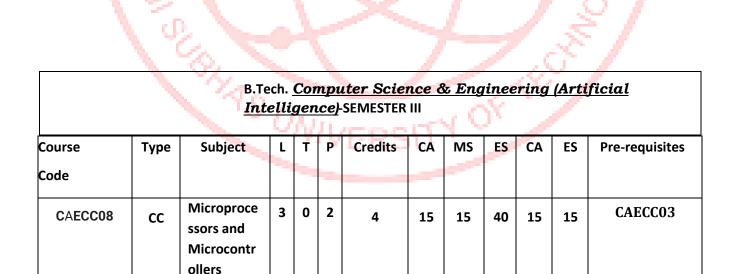

GPU architecture: Hardware Basics, Execution Model, GPU instruction set architecture, NVIDIA GPU instruction set architecture

#### Guidelines for Project work:

- Exercises using assembly-level programming and debugging to illustrate the working of instructions in the ISA of a CISC based /RISC based processor. These exercises should illustrate the status of various registers, flags, counters and pointers after data movement, data manipulation, program control, and stack operations.
- Semester-long group project on the design and simulation /hardware emulation of a simple processor.

#### REFERENCE BOOKS

- 1. William stallings, "Computer Organization and Architectue, PHI" 2. M. Morris Mano,
- 2. M. Morris Mano, "Computer System Architecture", PHI
- 3. J.D. Carpinelli, "Computer Systems Organization and Architecture," Pearson Education
- 4. Heuring and Jordan, Pearson Education, "Computer Systems Design and Architecture"
- 5. Tor M. Aamodt, Wilson Wai Lun Fung, Timothy G. Rogers General-Purpose Graphics Processor Architectures

#### COURSE OUTCOMES

- 1. Acquire knowledge of architecture and programming of microprocessors.
- 2. Understand the salient features of the x86 architecture.
- 3. Acquire hands-on knowledge of interfacing microprocessors with peripherals.
- 4. Understand the architecture and working of microcontrollers and their utility.
- 5. Acquire introductory knowledge about high-end microprocessors and microcontrollers.

#### COURSE CONTENT

Unit 1 - Intel 8085 microprocessor: Basic concepts of microprocessor, microcomputer, microcontroller. Architecture (pins, signals, buses, register set), addressing modes, instruction set (instruction format, opcode, mnemonic), subroutines, timing diagrams and t-states of different instructions, programming, recursive programs, vectored and non-vectored interrupts and interrupt handling of 8085.

Unit 2 - Intel 8086 microprocessor: Architecture (pins, bus interface unit, execution unit, register set, pipelining), memory addressing, segmentation, instruction set (data transfer, arithmetic, logic, string, long and short control transfer and processor control), timing diagrams, operating modes, programming, assemblers, address-objects, parameter passing to subroutines, hardware and software interrupts and interrupt handling of 8086.

Unit 3 - Interfacing of microprocessors: Interfacing a microprocessor with RAM and ROM chips, address allocation and decoding techniques. Interfacing with LED, LCD, ADC, DAC, toggle switch and keypad. Memory-mapped i/o. Interfacing with 8255 programmable peripheral interface (architecture, ports, i/o modes and BSR mode). Basic architecture and features of 8254 programmable timer, 8257 programmable DMA controller, 8259 programmable interrupt controller, 8279 programmable keyboard and display controller and 8087 math coprocessor.

Unit 4 - Microcontrollers: 8051 microcontroller: architecture, i/o ports, memory organization, addressing modes, instruction set, simple programs. Introduction to IoT: basic architecture, sensing and actuating, application domains.

Unit 5 - High-end microprocessors and microcontrollers: Important features of 32-bit processors, RISC and Pentium. Implementation of memory management schemes like segmentation, paging and virtual memory at the hardware level. Introduction to Arduino: basic architecture, hardware and software, simple programs.

# Guidelines for practical work:

- 1. Write an assembly program to generate the numbers of the Fibonacci series.
- 2. Write an assembly program to clear all flags without using any data transfer instruction.

- 3. Write an assembly program to search for a number in a list.
- 4. Write an assembly program to sort a list.
- 5. Write an assembly program to copy a list from one part of the memory to another.
- 6. Write an assembly program to multiply two numbers using successive additions.
- 7. Write an assembly program to calculate the square root of a number.
- 8. Write an assembly program to calculate the factorial of a number using recursion.
- 9. Write a self-replicating assembly program.
- 10. Interface 8255 with a microprocessor and use all its modes.
- 11. Interface 8254 with a microprocessor and use it to generate differ types of clock signals.
- 12. Interface 8259 with a microprocessor and use all its features.
- 13. Interface 8257 with a microprocessor and write a program to control a keypad and a LED display.
- 14. Design digital systems with Arduino and simple sensors and actuators.

#### COURSE OUTCOMES

- 1. Understand the function, structure, history of an operating system and the design issues associated with an operating system.
- 2. Understand the concept of multithreading, process management concepts including scheduling, synchronization and deadlocks.
- 3. Learn the memory management concepts including virtual memory.
- 4. Comprehend file system interface and implementation and disk management.
- 5. Be familiar with protection and security mechanisms.

#### COURSE CONTENT

#### Unit 1

Overview: Operating systems – structure, operations, components, types, services, user interfaces. System calls, system programs, system boot.

Process management: Processes – concept, scheduling, operations on processes, interprocess communications. IPC Methods, pipes, popen, pclose functions, Co-Processes, FIFOs, Message Queues, Shared Memory, Stream pipes, Threads – single-and multi-threaded processes.

#### Unit 2

CPU scheduling - criteria, algorithms, multiple-processor scheduling.

Process synchronization – critical-section problem, semaphores, classic synchronization problems, monitors.

#### Unit 3

Deadlocks - characterization, deadlock prevention, deadlock avoidance, deadlock

detection, prevention, avoidance, recovery from deadlock.

Memory management: Objective and functions, Simple monitor resident program, overlays- swapping, Main memory – memory allocation schemes, paging, segmentation. Virtual memory concept- demand paging, page interrupt fault, page replacement algorithms, segmentation – simple, multilevel, segmentation with paging, frame allocation, thrashing.

#### Unit 4

Storage management: File system - files and directories, structure and implementation of file systems, mounting and unmounting, storage allocation methods, free-space management. Disk - structure, scheduling, management.

#### Unit 5

I/o management: i/o hardware, i/o interface, kernel i/o subsystem. Protection and security: Access matrix, security threats. Case studies of latest operating systems.

# **Practical List**

Implement these programs in C/C++ using Linux/Unix environment operating system. Maintain hard copy of the same for final assessment.

- 1. Process creation and termination for operating system (fork, wait, signal, exit etc.).
- 2. Threads.
- 3. CPU scheduling algorithms: FCFS, SJF, Round Robin, Preemptive Priority Scheduling.
- 4. Inter process communication.
- 5. Critical Section problem.
- 6. Producer Consumer problem using bounded and unbounded buffer.
- 7. Reader Writers problem, Dining Philosophers problem using semaphores.
- 8. Banker's algorithm.
- 9. Page replacement algorithms: LRU, LRU-Approximation, FIFO, Optimal.
- 10. File operation system calls (open, read, close, append etc.)
- 11. Disk scheduling algorithms: FCFS, SSTF, SCAN, CSCAN, LOOK, CLOOK.

#### Text Book:

- 6. Operating Systems Nutt, Pearson Education Asia (2003)

# B.Tech. Computer Science & Engineering (Artificial Intelligence) SEMESTER IV

| Course No. | Туре | Subject  | Ч | Т | P | Credits | CA | MS | ES | CA | ES | Pre-requisites  |
|------------|------|--|---|---|---|---------|----|----|----|----|----|---|
| CACSC10    | cc   | Theory of<br>Automata<br>& Formal<br>language<br>s | 3 | 1 | 0 | 4       | 25 | 25 | 50 | 1  | ١  | Discrete<br>Structures<br>Computer<br>Programmin<br>g |

#### COURSE OUTCOMES

- 1. Students will be able to demonstrate knowledge of basic mathematical models of computation and relate them to the formal languages.
- 2. Acquire knowledge of Regular Languages, FA, CFG, Push Down Automata and Turing recognizable languages
- 3. Be able to get a broad overview of the theoretical foundations of computer science
- 4. Be able to think analytically and intuitively for problem solving situations in related areas of theory of computer science
- 5. Students will understand the limitations of computers and learn examples of unsolvable problems.

#### **COURSE CONTENT**

#### UNIT I

Finite Automata: Deterministic FA, Non deterministic FA, Regular expressions, Finite Automaton with €- moves, Regular Expression, Regular Languages and Kleene's theorem- Conversion of NFA to DFA, Equivalence of finite Automaton and regular expressions, Arden's Theorem. Myhill Nerode

Theorem, Minimization of DFA, Pumping Lemma for Regular sets, Problems based on Pumping Lemma.

#### UNIT II

Context Free Grammar: Grammar, Types of Grammar, Context Free Grammars and Languages, Derivations, Ambiguity, Relationship between derivation and derivation trees, Simplification of CFG, Elimination of Useless symbols - Unit productions - Null productions, Chomsky normal form (CNF), Greibach Normal form (GNF), Problems related to CNF and GNF.

#### UNIT III

Pushdown Automata: Moves, Instantaneous descriptions, Deterministic pushdown automata, Equivalence of Pushdown automata and CFL, pumping lemma for CFL, problems based on pumping Lemma.

#### UNIT IV

Turing Machine: Definitions of Turing machines, Computable languages and functions, Techniques for Turing machine construction, Multi head and Multi tape Turing Machines, The Halting problem, Partial Solvability, Problems about Turing machine- Chomsky hierarchy of languages.

#### UNIT V

Difficult problems: Unsolvable Problems and Computable Functions, Primitive recursive functions, Recursive and recursively enumerable languages, Universal Turing machine, Measuring and classifying complexity - Tractable and Intractable problems,

#### SUGGESTED READINGS

#### COURSE OUTCOMES

- 1. Distinguish between a conventional system and an intelligent system
- 2. Explain Artificial Intelligence concept and its applications
- 3. Represent knowledge using various different techniques
- 4. Use the appropriate searching techniques and reasoning methods in achieving desired goals.
- 5. Understand the future of AI and ethical implications of developments in AI

#### COURSE CONTENT

#### UNIT 1:

# Fundamentals of AI

#### Introduction

What Is AI, The Foundations of Artificial Intelligence, The History of Artificial Intelligence, The State of the Art, Risks and Benefits of AI

#### **Intelligent Agents**

Agents and Environments, Good Behavior: The Concept of Rationality, The Nature of Environments, The Structure of Agents

#### UNIT 2:

#### Problem-solving -I

# Solving Problems by Searching

Problem-Solving Agents, Example Problems, Search Algorithms, Uninformed Search Strategies, Informed (Heuristic) Search Strategies, Heuristic Functions

# Search in Complex Environments

Local Search and Optimization Problems, Local Search in Continuous Spaces Search with Nondeterministic Actions, Search in Partially Observable Environments, Online Search Agents and Unknown Environments

#### UNIT 3:

# Problem-solving -II

#### Adversarial Search and Games

Game Theory, Optimal Decisions in Games, Heuristic Alpha-Beta Tree Search, Limitations of Game Search Algorithms

# Constraint Satisfaction Problems

Defining Constraint Satisfaction Problems, Constraint Propagation: Inference in CSPs, Backtracking Search for CSPs, Local Search for CSPs, The Structure of Problems

#### UNIT 4:

# Knowledge, reasoning and representation Logical Agents

Knowledge-Based Agents, The Wumpus World, Logic, Propositional Logic: A Very Simple Logic, Propositional Theorem Proving, Effective Propositional Model Checking, Agents Based on Propositional Logic

#### First-Order Logic

Syntax and Semantics of First-Order Logic, Using First-Order Logic, Knowledge Engineering in First-Order Logic

#### Inference in First-Order Logic

Propositional vs. First-Order Inference, Unification and First-Order Inference, Forward Chaining, Backward Chaining, Resolution

#### **Knowledge Representation**

Ontological Engineering, Categories and Objects, Events, Mental Objects and Modal Logic, Reasoning Systems for Categories, Reasoning with Default Information

#### SUGGESTED READINGS

#### COURSE OUTCOMES

- 1. To introduce students about different digital modulation schemes.
- 2. To introduce the students the functions of different layers of networking.
- 3. To introduce various types of access control methods.
- 4. To make students to get familiarized with different protocols and network components.
- 5. To introduce the students about basic queuing models

# COURSE CONTENT

#### UNIT-I

<u>Digital Communication</u>: Sampling theorem (Instantaneous Sampling, Natural Sampling and Flat Top Sampling), PAM, PPM, PWM, Quantization noise, PCM, Binary Modulation: ASK PSK, FSK, MSK, DPSK, QPSK and their probability of error calculation.

#### UNIT-II

<u>Data Communications:</u> Review of Error Detection and Correction codes. Need of line coding Line coding scheme: Unipolar, Polar, Bipolar and Multilevel Encoding, Network and Protoco Architecture, Reference Model ISO-OSI, TCP/IP-Overview, topology, DTE-DCE interface interface standards, modems, cable modem, transmission media. Switching: Circuit switching (space-division, time division and space-time division), packet switching (virtual circuit and Datagram approach), message switching,

#### UNIT-III

<u>Data Link Layer:</u> Data Link Control and Protocols: Flow and Error Control, Stop-and-wait ARQ. Sliding window protocol, Go-Back-N ARQ, Selective Repeat ARQ, HDLC, Point-to – Point Access: PPP Point –to- Point Protocol, PPP Stack, IEEE standard 802.3 & 802.11 for

LANS, high speed LANs, Token ring, Token Bus, FDDI based LAN, Network Devices-repeaters, hubs, switches bridges.

#### UNIT-IV

Medium Access Sub layer: Channel allocation problem, multiple access protocols (ALOHA, CSMA and CSMA/CD)

Network Layer: Design issues, Routing algorithms, Congestion control algorithms, Host to Host Delivery: Internetworking UNIT-V

Queuing Theory: Finite Markov Chain –Discrete and continuous time Markov chains, Classification of states, Limiting distribution, Birth and death process, Poisson process, Steady state and transient distributions, Simple Markovian queuing models (M/M/1, M/M/1/N).

# List of Experiments

- 1. Introduction to MATLAB
  - a. Matrix computation.
  - b. To Plot Sine Wave of frequency 200 Hz.
  - c. To plot a pulse of width 10.
  - d. Plot the spectrum (Amplitude and phase) Of the pulse generated in 3.
- 2. Uniform random number and plot its density function. Find its mean and variance.
- 3. Generate Gaussian distributed random number and plot its density function. Find its mean and variance.
- 4. Compute the Signal to quantization Noise ratio of Uniform Quantization. Plot SNQR versus Quantization levels.
- 5. Compute the Signal to quantization Noise ratio of Non-Uniform Quantization. Plot SNOR versus Quantization levels.
- 6. Study of passband digital communication technique BPSK. Calculate the BER of BPSK modulated signal.
- 7. Given is a linear block code with the generator matrix G
- 1100101
- a. G = 0 1111001110011
  - a. Calculate the number of valid code words N and the code rate RC. Specify the complete Code set C.
  - b. Determine the generator matrix G' of the appropriate systematic (separable) code C'.
  - c. Determine the syndrome table for single error.
- 8. To generate a M/M/1 Queue having infinite buffer space with parameters ( $\lambda$ ,  $\mu$ ) and plot the average delay per packet vs  $\lambda/\mu$ .
- 9. To generate a M/M/1 Queue having finite buffer space with parameters  $(\lambda, \mu)$  and plot blocking probability with respect to variation with buffer space.
- 10. To simulate STOP and WAIT protocol using M/M/1 queuing system and plot average delay per packet vs  $\lambda/\mu$ .
- 11. To simulate SLIDING WINDOW protocol and evaluate its performance

with variation of window size.

- 12. Observe and measure the performance of TOKEN BUS MAC Layer protocols by changing the network load, distance between the nodes.
- Observe and measure the performance of ALOHA protocol by changing 13. the network load, distance between the nodes.
- Observe and measure the performance of CSMA protocols by changing 14. the network load, distance between the nodes.
- Observe and measure the performance of CSMA/CD protocols by 15. changing the network load, distance between the nodes.

#### COURSE OUTCOMES (CO)

- 1. To understand the detailed concept of probability and applications.
- 2. To know about Continuous Frequency distribution.
- 3. To know about MGF and Method of Least square.
- 4. To understand the concept of large samples.
- 5. To understand sampling theory for small samples and inference.

#### COURSE CONTENT:

#### UNIT-1

Probability: Mathematical and Statistical definitions and problems, Marginal probability, Random variables, discrete and continuous random variables, Mathematical Expectation, Moments, Central moments, Kurtosis.

#### **UNIT-2**

Important Theoretical Distributions: Review of continuous and discrete probability distributions, Negative binomial distribution, Fitting of standard distributions, Fitting of Normal distribution by method of areas and method of ordinates, Hypergeometric distributions, Multinomial distribution, Rectangular distribution, Beta distribution of first and second kind, Gamma distribution, Cauchy's distribution, Geometrical probability, Tchebycheff's and Markoy's inequalities.

# UNIT-3

MGF and Method of Least Square: Change of origin and scale in MGF, moment generating functions of standard distributions (Poisson, Binomial, Exponential, Uniform, Normal, Gamma, chi square), Cumulants, characteristic function, Weak law of large numbers, Central limit theorem. Method of least squares: Fitting of straight lines, parabola and exponential curves.

#### UNIT-4

Simple sampling of attributes: Large samples, mean and S. D. in simple sampling of attributes, Test of significance for large samples, Standard error, Type I and II errors, Null hypothesis, Confidence limits, Chi-square distribution, Degree of freedom, Level of significance, Test of goodness of fit, Test of independence, Coefficient of contingency, Yate's correction for continuity.

#### UNIT-5

Sampling of variables and Inference: Small samples, t-distribution, test of significance of the mean of random sample from normal population, F-distribution, Relationship between t, F and chi square distributions, Inference: Point estimation, interval estimation, properties of good estimator, Maximum likelihood parameter.

**Recommended Books:** 

- 1. An Introduction to Probability Theory and Its Applications, Vol. 1 (Wiley Series in Probability and Statistics) by W. Feller, 1968
- 2. Advanced Engineering Mathematics by Erwin Kreyszig (Wiley Publication), 2020
- 3. Probability & Statistics- SOS by Spiegel, McGraw Hill, 2010
- 4. Probability and Statistics for Engineers by Anthony J. Hayter (Cengage Learning), 2013
- Mathematical Statistics, Krishna Prakashan Media by J. K. Goyal and J. N. Sharma, 2014

- 4.3.5 SYLLABI OF PROGRAM CORE COURSES: V SEMESTER
- 4.3.6 SYLLABI OF PROGRAM CORE COURSES: VI SEMESTER
- 4.4 DEPARTMENT ELECTIVE COURSES
- 4.4.1 LIST OF DEPARTMENT ELECTIVES
- 4.4.2 SYLLABI OF DEPARTMENT ELECTIVES COURSES: V SEMESTER
- 4.4.3 SYLLABI OF DEPARTMENT ELECTIVES COURSES: VI SEMESTER
- 4.4.4 SYLLABI OF DEPARTMENT ELECTIVES COURSES: VII & VIII SEMESTERS
- 4.5 OPEN ELECTIVE COURSES
- 4.5.1 LIST OF OPEN ELECTIVES
- 4.5.2 SYLLABI OF OPEN ELECTIVE COURSES: SCIENCES
- 4.5.3 SYLLABI OF OPEN ELECTIVE COURSES: HUMANITIES & SOCIAL SCIENCES
- 4.5.4 SYLLABI OF OPEN ELECTIVE COURSES: MANAGEMENT
